# What's New

# Personally Connected

**Create a personal connection with a personalised gift and customised packaging, including a personal note or letter, all delivered individually.**

Create a personal welcome to your meeting with personalised gifts. Combine your company logo with individual names of the participants of your meeting.

Welcome the attendees of your webinar with an attendance gift in your corporate identity. All sent to the home addresses of those invited.

Say thank you to all your employees or relations by sending a fully personalised gift delivered to their home address with a personal note. Giftwrapped and shipped in your own customised delivery box.

You want to congratulate your team, with the completion of a successful project. A personalised gift sent to each team member that boosts the celebration. This can all be arranged for you without any logistical or organisational hassle.

### Make a personal connection...

- ✓ With a personalised gift and customised packaging
- ✓ With a personal note or letter
- ✓ All delivered individually

### Personal.

# IMPACT

## THE IMPACT COLLECTION

Making a positive impact on the use of water and proving it!

**The IMPACT collection is a line of products that aim to make a positive impact. There is a responsibility towards the environment that cannot be ignored. The IMPACT collection focuses on the use of water.**

### Why water?

#### Tangibility

Water shortage is a very visible and understandable issue for everybody, compared to CO2 or Nitrogen

#### Urgency

By 2025, 50% of the world's population will experience so called 'water stress'; having to deal with a lack of sufficient and ready to use drinking water

#### Scope

The issue of water is a worldwide one, from melting Arctic fresh water into salty oceans, to dried out lands, consequences of water issues are found all over the globe.

### How?

**We distinguish three main areas where the Impact collection can contribute in the use of water:**

**1.**

By using recycled cotton and recycled PET, saving up to 1.800 L of water per product.

**2.**

By using glass and stainless steel materials, improving the re-usability of products compared to single use products.

**3.**

By donating 2% of every sold product from the Impact collection to Water.org.

# IMPACT

## SUPPORTING

**"The water crisis is the #4 global risk in terms of impact to society"**

### We believe in water

Water.org is a global nonprofit organization working to bring water and sanitation to the world. Water.org wants to make it safe, accessible and cost-effective. Water.org helps people get access to safe water and sanitation through affordable financing, such as small loans. Water.org gives their everything, every day to empower people in need with these life-changing resources – giving women hope, children health and families a bright future.

### What is the world water crisis?

Water is essential to life, yet with 785 million people in the world - 1 in 9 - lack access to it. According to a report by the World Economic Forum, the water crisis is the #4 global risk in terms of impact to society. Water.org is working every day to change this. Water.org is here to bring safe water and sanitation to all. By empowering people with this fundamental human need, Water.org is helping to provide families with hope, health and the opportunity to break the cycle of poverty.

**For each product sold we will donate 2% of proceeds to support Water.org to change lives with safe water.**

# IMPACT

## THE IMPACT COLLECTION

Making a positive impact on the use of water and proving it!

### The world is in transition:

*"There is a growing push on sustainability"*

*"A new generation demands action"*

*"Everybody wants transparency about sustainable fabrics being used. But do they get it...?"*

*"Sustainability is a jungle!"*

*"Some brands simply buy off their sustainable responsibility, this is greenwashing!"*

*"The biggest fear of brands and companies: being accused of greenwashing"*

### Do you trust sustainability claims?

As the production supply chain of a final product can be long, how can you be sure that original recycled feedstock has been used in the final product?

#### Do you dare to guarantee?

We aim to avoid greenwashing and prove the true story of recycled fabrics. Aware™ offers the technology to deliver that proof for the bags and portfolios in the Impact collection.

# IMPACT

With **Aware™** we guarantee the genuine recycled content and environmental impact reduction claims, by using a disruptive **tracer and blockchain technology**

## What is Aware™ ?

**Aware™ is a virtual component that verifies sustainable content in a final product by tracer technology and validate claims by blockchain technology.**

### The process in a nutshell:

#### STEP 1. Activate

Insert our tracer in recycled fibre and register original certifications in digital tokens on blockchain.

#### STEP 2. Produce

Produce final bags and portfolio products for the IMPACT collection.

#### STEP 3. Scan

Check tracer content in final products.

#### STEP 4. Authenticate

Match with digital tokens in blockchain to connect with original certification and impact data.

For more info go to <https://www.wearaware.co>

# IMPACT

## The impact of cotton on water is irresponsible

Production of 1 kg of cotton uses 10.000 litres of water (source: bettercotton.org)

Cotton production is mostly situated in areas where drinking water is scarce

Pollution of rivers because of the dyeing

**Standard cotton bag**

vs.

**Impact Collection recycled cotton bag**

- ✓ Proven Recycled by Aware™
- ✓ Proven water saved
- ✓ Confirmed sustainable!

This bag takes **1.630 litres** of water to be made

This bag needs **0.02 litres of water** to be made

On average, 1.600 litres is enough for the **total water consumption of one adult, per year!**

**With this knowledge, you have the responsibility make the right choice.**

## Impact Aware™ Recycled cotton tote

Carry your essentials inside this casual tote bag made with Aware™ Recycled cotton. This tote bag features a minimalistic design with two top handles that can be carried on the shoulder or by hand. This tote bag is made of 100% 330 gr/m2 recycled cotton, saving thousands of litres of water. One kilo of conventional cotton requires 9,800 litres of water. Aware™ Recycled cotton requires zero water! The Aware™ fibres used in this tote are fully traceable with a unique validation system of tracer ID and blockchain verification. A truly sustainable and reusable bag for everyday use.

Traceable And Genuine Recycled PET With Validated Impact!

**Look good, Feel good, Do Good!**

**Everyone likes to talk about rPET, because rPET now has a very positive image. But what exactly is rPET? What about that r from Recycled, how recycled is this PET really?**

It is a fact that recycling PET has a very positive impact on our environment compared to virgin PET. Not only do we remove and keep plastic from our environment in this way, we also save 1.9 litres of oil per kg of product compared to virgin PET. With almost 10 billion kg of PET in circulation (production since 1950), there is still a lot to save.

## How much effect has rPET?

Of course you are curious what all these new techniques contribute to our environment. How much effect does rPET and Cotton from Aware™ really have? To make everything transparent, we have provided each product with a label on which we clearly indicate how much savings have been achieved! Convincing for you and a nice message to the receiver. The Impact Collection is a gift with a message.

## Stainless steel & glass

### Why glass

Besides the beautiful design possibilities that glass offers, it can be recycled endlessly 100%. In many cases, the recycling is possible locally. In Europe, no less than around 76% of the glass is recycled. By using glass shards instead of lime, sand and soda, glass production also saves 3% energy and even reduces CO2 emissions by 5%.

With the use of the latest techniques, glass is now much stronger. Furthermore, glass is heat resistant and very easy to clean, making it very hygienic during use. Perfect for a solid product made for intensive use.

### Stainless steel

Stainless steel is a material often used for the production of insulating bottles and water bottles. It is a beautiful and sustainable material. Like glass, stainless steel can be recycled endlessly. It also shares characteristics of easy cleaning and hygienic use with glass.

The high demand in recycled stainless steel means that it is not always available, in particular for smaller projects. This is the reason why for this bottle, virgin stainless steel was preferred.

**By refilling reusable stainless steel or glass IMPACT bottles you help to reduce the environmental impact of transporting bottled water in plastic bottles.**

Transporting plastic bottles over long distances costs energy and disturbs the natural cycle of water. Bottled water requires up to 2.000 times the energy used to produced tap water. And it takes around 450 years for a plastic bottle to completely degrade.

**For each product sold we will donate 2% of proceeds to support Water.org to change lives with safe water.**

## UV-C steriliser box with 5W wireless charger

Multifunction UV-C steriliser that kills up to 99,9% of the bacteria placed inside the device. Simply place objects like earbuds, jewellery, watches and facemask inside the steriliser to sterilise them using UV-C technology. You can choose to do a quick clean in 90 seconds or a complete clean in 5 minutes. The 2 UV-C LED light inside is non-toxic and made without mercury like many UV lamps in the market. The design will also ensure that the UV-C led light will switch off automatically when the box is opened so the user will not be exposed to the UV-C light. The lights have a lifecycle of 10.000 hours. On top of the steriliser is a 5W wireless charger to charge your mobile device. Including 100 cm PVC free TPE type C cable. Input: 5V/1.5A; Output: 5/1A - 5W.

- ✓ Sterilise up to 99.9%
- ✓ Can be used for various items
- ✓ Non toxic mercury free LED

# BOBBY BACKPACK TROLLEY

## Bobby backpack trolley

Convenient as a trolley and practical as a backpack. The Bobby backpack trolley is your ideal travel companion for short trips or daily commute. Easily transform it from a backpack into a trolley by storing the shoulder straps in the back panel and releasing the handle. When switching into backpack mode, you can hide the handle and wrap the backpack around the wheels, keeping your back clean. The Bobby backpack trolley keeps you safe and connected with the well-known Bobby anti-theft features combined with a TSA® lock. Inside, you will find separate compartments for clothes and business devices with a quick access laptop pocket that opens at a 30-degree angle and fits laptops up to 17". In addition, you have a water bottle pocket and an RFID protected pocket protecting your identity. The Bobby backpack trolley is made from recycled materials and can be taken on board aircrafts as carry-on luggage. Registered design®

- ✓ Dual function: backpack & trolley
- ✓ Integrated USB charging port and TSA lock
- ✓ Cut resistant material
- ✓ Separated compartments for clothes and professional items
- ✓ Made from recycled materials
